This exploded view diagram illustrates the components of a shower head assembly. The assembly is organized into three main sections, each indicated by a bracket and a label:

- Section A:** Contains the shower head face (a shallow, dome-shaped cap) and a small O-ring or seal.
- Section B:** Contains a single shower arm (a long, threaded rod with a decorative finned section).
- Section C:** Contains three concentric rings or flanges that form the mounting base of the shower head.

At the bottom right, a circular component with a flange is labeled with a circled number 1, representing the shower head body or the final assembly point.
